

CHAPTER 1– INTRODUCTION

There are many steps involved in the process of solving a client’s problem. We can consider this step as the First step of them. We have already studied the company’s current situation and determined the areas that need to be developed. Also we have done a feasibility study regarding to this project.

1.1 Terms of Reference

How do we refer the client’s problem? Or else identifying the problem correctly is done here.

- Understanding the problem
 - Identify processes, draw ER and DFD’s.
- Checking whether the existing technology can solve the client’s requirement.
- Cost benefit analysis
 - Checking whether the proposed software can bring economic benefits.
- Checking whether the user will accept the software or not.
- Feasibility study
 - Checks if there are any legal hassle.
- Collecting data
 - Interview.
 - Studying their reports and workflow.

1.2 Objectives of Study

Identifying a real life business problem and provide a computer solution using concepts learned under different modules in the Higher Diploma in Computer Based Information Systems is the main objective of the study. System Development project has led us to combine all the modules that we learned under a year, to a one module. This project has sharpened the knowledge of Database Management Systems, Programming Languages and Business Information Systems & System Analysis modules. And also this showed us how to utilize obtained knowledge and how to implement software.

1.3 Methodology

Methodology means the methods which we use to complete our project. Mainly there are two methods. Object oriented method and structured method are them. We suppose to use a mixed method.

1.4 Duration of the Project

ID	Task	Duration (days)	Start	End
1	Preparing problem statement - Discussion with the company and note down the important facts.	03	02/01/2015	04/01/2015
2	Understanding general requirements. - Team discussion about the problem.	03	07/01/2015	09/01/2015
3	Meeting with supervisor.	01	20/01/2015	-
4	ER & DFD designing	05	26/01/2015	30/01/2015
5	File designing (database deigning)	03	03/02/2015	05/02/2015
6	Screen designing	04	05/02/2015	08/02/2015
7	Writing pseudo codes	05	08/02/2015	11/02/2015
8	Implementation	10	12/02/2015	21/02/2015
9	Writing project report	03	22/02/2015	25/02/2015
10	Final preparing & proofreading	02	25/02/2015	26/02/2015

Table 1.1 – Duration of the project

CHAPTER 2 – EXISTING SYSTEM

2.1 Outline of the Company Background

“SAVE US” is a specialized non profitable organization that is concerned with orphaned children. It was established on 7 December 2014, with Overall management and administration of the organization takes place at its headquarters in Galle.

Its current priorities include saving children from communicable diseases, in particular malaria and tuberculosis. Organization’s primary aims of organization are health, development, and aging; nutrition, food security, receive an adequate education and healthy eating; occupational health; substance abuse.

CHAPTER THREE – PROPOSED SYSTEM

3.1 Benefits of the proposed system

- Data redundancy is reduced to a considerable amount. So it saves space and time which was wasted on updating the same thing at many places.
- Gives the user a friendly environment.
- Security is enhanced. Not everyone can log in to the system.
- The system provides reliable transactions and the transactions are done much faster.

Screen Number : SCR 07

Screen Name : User Login

Description : Login screen for users

Design

The screenshot displays the user login interface for the 'SAVE US' Child Fund. At the top, the organization's logo is shown alongside the slogan 'ONE CHILD AT A TIME'. Below this is a horizontal navigation menu with links for 'HOME', 'MEET CHILDREN', 'HELP PROJECTS', 'CONTACT US', and a teal 'Donate' button. The central section, titled 'LOGIN AS A MEMBER', provides a login form. It prompts users to 'Login Using Your E-mail And Password' and includes input fields for 'E-Mail' and 'Password'. Below the fields are buttons for 'Login', 'Forgot Password', and 'Register', along with a link for 'Not a Memeber Yet ?'.

Figure 3.12 – User Login

Screen Number : SCR 08

Screen Name : Recover Password

Description : If user forget his/her password, can recover using this page.

Design

The screenshot shows the 'RECOVER YOUR PASSWORD' page of the 'SAVE US' Child Fund website. The header includes the 'SAVE US' logo with the tagline 'ONE CHILD AT A TIME' and navigation links: HOME, MEET CHILDREN, HELP PROJECTS, CONTACT US, and a prominent 'Donate' button. The main content area is titled 'RECOVER YOUR PASSWORD' and contains a form with the instruction 'Please Provide Following Details'. The form fields are: E-Mail (text input), Security Question (dropdown menu showing 'Your 1st Pets' Name?'), Answer (text input), Card Type (radio buttons with MasterCard, VISA, and AMERICAN EXPRESS logos), and Card Number (text input). At the bottom of the form are 'Submit' and 'Reset' buttons.

CHAPTER 4 – COST BENEFIT ANALYSIS

4.1 Hardware and Software requirements

Item	Quantity	Price
Go Daddy Server	1	15,000
Software implementing	-	50,000
Training staff	-	FREE
Total Cost	-	65,000 LKR

CHAPTER 5 – CONCLUSION

Every company has different operation flows and managing processes. After hearing and understand the current situation and objectives from clients, we evaluate and analyze the management software and the network. With the available competition in this current business world, we believe that our software solution may help our clients a lot. High performance, Cost saving business operations using new and improved system processes are two of the major advantages that can be obtained from our software solution.

Not even that, throughout the whole process of implementing this project, we gained an important knowledge than learning from books.
